

"A DAY IN THE GARDEN"

Saturday, March 8, 2008
UW Campus - Fond du Lac LGI Room

PROGRAM

9:00 a.m. to 10:30 a.m.

"Rose Gardens for Every Season" - Jeff Epping - Join Olbrich Botanical Gardens' Director of Horticulture, Jeff Epping, for an in-depth look at how he and his staff created a beautiful new rose garden at Olbrich. Their rose garden showcases hardy, disease-resistant shrub and climbing rose varieties that need much less care than the vast majority of roses on the market today. See how you too can combine bulbs, annuals, perennials, vines, shrubs and small-scale trees with a variety of roses to create a truly spectacular Midwestern rose garden.

10:45 a.m. to 12:15 p.m.

"Extending Seasonal Raspberry Harvest" - Dr. Robert Tomesh - Senior Horticulture Educator and WI Master Gardener Educational Director - Join Dr. Robert Tomesh in a discussion regarding the ins and outs of growing raspberries in Wisconsin and how to prune correctly. Raspberry fruit production in Wisconsin is available from June through September. With today's early fruiting summer cultivars and fall fruiting cultivar selections, one can easily have fresh raspberries available through this extended period.

12:15 p.m. to 1:00 p.m. - LUNCH

1:00 p.m. to 2:30 p.m.

"Garden Inspirations - from England to Olbrich" - Jeff Epping - The gardens of England are among the very best in the world and are an unending source of inspiration to all that are lucky enough to pay them a visit. Join Jeff Epping for an inspiring slide presentation that illustrates these ideas both in English gardens and at Olbrich. Epping's beautiful images were taken at Olbrich over the last 12 years, as well as visits to over 100 gardens in both the U.S. and England.

2:45 p.m. to 4:15 p.m.

"Invasive Species" - Dr. Mark Renz, UW-Madison Extension Weed Management Specialist - Dept. of Agronomy The focus of this talk will be on perennial weed control in our gardens and invasive species control in the landscape. Mark recently came to Wisconsin from New Mexico where he worked extensively with invasive species.

OR - Break-out Session - 2:45 p.m. - Limited number of participants - register early

"Fruit Tree Grafting" - Dr. Robert Tomesh - A special hands-on fruit tree grafting session will be held in another classroom for a limited number of participants. You will take home 2 or 3 grafted apple, pear, plum or peach fruit trees. **An additional fee of \$10** will be collected upon attending this session - do not send with registration. You will be notified upon registration on March 8.

UW-Extension reserves the right to cancel programs due to insufficient registration.

University of WI-U.S. Dept. of Agriculture-Fond du Lac County Cooperative. UW-Extension provides equal opportunities in employment and programming and Title IX requirements.
