YSCREEN/TEENSCREEN PROGRAM  
**Goals/Objectives**  
Mission is to offer YScreen to all youth in FDL County before the age of 18. The Fond du Lac area TeenScreen Program began in 2002-2003, when the Fond du Lac School District partnered with area pediatricians and mental health specialists to develop a pilot emotional health screening program offered to 9th grade students through health class. Fond du Lac High School was the first high school in the state of Wisconsin to pilot the TeenScreen program. After eleven years, in the Fall of 2013, the TeenScreen tool was no longer available for use and the program’s title was formally trademarked and changed to YScreen. The YScreen program currently utilizes the Pediatric Symptom Checklist-Youth Report as the measuring instrument, which research shows is an equally valid tool used to assess the health of teenagers and assist teens in connecting with professional assistance if necessary.  
1) To improve the overall emotional health of our youth by offering all youth emotional health screening by the time they turn 18  
2) To effectively screen youth for interfering emotional problems and facilitate effective interventions and treatment  
3) To reduce the stigma of emotional health issues and increase public knowledge and awareness.  
**Target:**  
Youth under the age of 18
